summary

Front End Web Developer and Designer passionate about creating aesthetically pleasing websites to improve user interface experience. Using my newly developed skills to design websites, computer graphic, and social media posts.

technical skills

Languages: HTML, CSS, JavaScript, Express, JSX

Applications: MongoDB, Node.js, React.js, Adobe Spark, Microsoft Office

projects

DBYNWTME | | <https://mawil583.github.io/Project-1/>

- This website allows users to search for the most popular events in a city of their choice. A table populates with the event info and the weather information from the exact time that the event starts.
- Responsibilities: Front End Developer and Design
- Technical: CSS3, HTML5, Moment.js, Bootstrap, jQuery, Algolia Places Library (autofill), Darksy API, Eventful API, and OpenCage API

In A Giphy | | <https://thenicoleduncan.github.io/giphy-page/>

- A gif finder site that incorporates an ajax call to Giphy's API. This website is designed to display several random gifs associated with the topic of the user's choice.
- Responsibilities: Front End Developer and Design
- Technical: CSS3, HTML5, Bootstrap, jQuery, Giphy API
